A hand-drawn diagram of a circuit board component, labeled with the number 63 in the top right corner. The component has a rectangular outline with several internal components and connection points. On the left side, there are four connection points labeled 71, 72, 73, and 74, each connected to a specific part of the internal structure. The internal structure includes a central vertical column of components labeled T, A, O, N, S, and I from top to bottom. To the right of this column are two horizontal rectangular components labeled R and H. A small circle with the number 0 is located at the top right corner of the component's outline.
